Domestic Ductile Iron Flange Program

As part of the ARRA (American Recovery and Reinvestment Act) Stimulus Program, projects funded under the act require material to be domestically manufactured. This has commonly been referred to as the 'Buy American' provision. The recipients of the ARRA funds are responsible for maintaining documentation indicating compliance with the Buy American provision.

Based on ARRA requirements, we will be stocking Domestic 2" - 24" A-536 Ductile Iron Back-up Flanges (painted and galvanized).
