

2nd Shift Maintenance Technician

Glasgow, KY Felker Brothers in Glasgow, KY has an immediate opening for a 2nd shift Maintenance Technician.

The Felker Bros. facility contains multiple process lines and produces Stainless Steel Piping products used in waste water treatment, chemical plants, mining and food and beverage industry. The main goal for this position is to provide preventative maintenance on the facilities production equipment and to repair both mechanical and electrical problems with a sense of urgency to ensure continuous operation.

Job duties must be performed safely and efficiently and will include completing preventative maintenance routes, equipment troubleshooting, mechanical and electrical repairs, pipe fitting, instrument calibration, and PLC diagnostics. This position will report to the Plant Engineer and the candidate will need to be proficient and self-sufficient with little direct supervision.

The ideal candidate will be a highly motivated, self-starter with a well-rounded technical skills base and proficient trouble shooting skills. The candidate must be able to work effectively within a team based organization.

The successful candidate will possess the following qualifications and must be available to work 2nd shift with periodic overtime and off shift coverage requirements

- 2 year technical degree or equivalent job experience is required – be willing to attend certain job related courses as part of the training process
- 5 years of Industrial Maintenance experience
- Must have experience in troubleshooting and repairing industrial machinery
- Must have experience with hydraulics, pneumatics, mechanical power transmissions, motor controls, pipe fitting and welding
