

Quality Manager

Responsible for defining, developing and implementing the Quality System, processes and procedures for controlling and maintaining the desired level of quality for all goods and services supplied by Felker Bros. Corp. and identifying opportunities for quality improvement. Also responsible for reviewing product design, coordinating with manufacturing, engineering, suppliers and customers to resolve quality problems. Additionally responsible for supervising quality department personnel and development and maintaining annual budget.

This position requires a Bachelor's Degree in Quality or Technical Engineering or related engineering discipline and 4-6 years of quality experience in a manufacturing environment. Also requires strong leadership and management skills, sound verbal and written communication skills, demonstrated ability to work independently and with others. Experience with stainless steel manufacturing and piping fabrication is preferred.

We offer a competitive wage and benefit package, to include health, dental, life and disability insurance, paid holidays and vacation and a 401k/profit sharing plan. Interested candidates may apply by application to:
